UEI: JGEVMDDFH285
CAGE: 225W5
Primary NAICS: 541511
Secondary NAICS: 541430
Status: WOSB / EDWOSB certified
PSC: DA10, DA01
Payment Terms: Credit Cards Accepted

COMPANY OVERVIEW

Creatively Ewe delivers agile web development, bespoke design, and secure payment architectures for government agencies. We leverage a custom-engineered, privately developed PHP framework to deploy secure, Website-as-a-Service offerings, paired with a standalone post-deployment subscription service, providing ongoing Section 508 compliance.

CORE COMPETENCIES

- **Full-Stack WordPress & Theme Engineering:** Rapid deployment of secure, high-fidelity web configurations utilizing our privately developed proprietary PHP and UI/UX design frameworks; ensures high-performance, brand-aligned layouts while compressing project timelines and natively embedding WCAG 2.2 AA standards.
- **Zero-Liability Digital Commerce Architecture:** Engineering streamlined transaction environments utilizing secure API integration and tokenized transmission pipelines to process public fees, utilities, and donations with zero server-side data retention.
- **Concierge Content Governance & Lifecycle Maintenance:** A standalone, post-deployment subscription service utilizing secure, dedicated intake pipelines to execute content modifications—systematically safeguarding data integrity, eliminating design drift, and maintaining strict Section 508 compliance.

DIFFERENTIATORS

- **Proven Public Sector Reliability:** Actively trusted by municipal government agencies to remain highly secure, compliant, and continuously operational under continuous maintenance agreements.
- **Federal-Ready Infrastructure:** 100% of digital assets are deployed within fully managed, single-tenant, FedRAMP-certified cloud environments, ensuring zero-friction and ongoing federal compliance.

REPRESENTATIVE PORTFOLIO PROJECTS

Municipal Website & Non-Profit Hub - *Local City Government* | *Prime* | *2024 – 2026*

- **Engineered Civic Information Architecture:** Deployed unified municipal Website-as-a-Service (WaaS) featuring dedicated sub-structures for departments, services, and an indexed, search-optimized repository for city ordinances and council meeting documents.
- **Integrated Third-Party Fundraising SaaS:** Connected external Give Lively API endpoints and secure Stripe Payment Links to embed dedicated, donation pipelines for the city's associated historical society and food shelf.
- **Concierge Content Governance:** Provided comprehensive post-launch environment maintenance, content modifications and security updates.

Municipal Resident & E-Commerce Portal - *Local City Government* | *Prime* | *2021 – 2026*

- **Unified Digital Commerce:** Engineered a municipal ecosystem that allows residents to access critical civic data while consolidating highly variable municipal liabilities (utility payments), and fixed regulatory fees (permits, variances), into a single secure transaction while delivering automated, PCI-compliant processing.
- **Secured Identity & FinTech Architecture:** Developed resident registries anchoring property addresses to user accounts, utilizing proprietary core libraries paired with Stripe APIs to process municipal revenue. Designed the system for zero server-side financial data retention, successfully offloading payment tokenization and PCI-compliance liability to Stripe’s secure infrastructure.
